# PRIVACY ANYTIME, ANYWHERE

The acoustic POD was born to address two core issues relating to open plan environments: firstly, the need for physical and acoustic privacy, and secondly, the need for internal rooms.

## DESIGNED TO FIT

Made to be portable and flexible in various sizes, the POD is ideal for a range of different uses.

## OPEN-PLAN OFFICE

These offices face the problem of excessive, distracting noise caused by loud conversations, keyboard typing, telephone rings, loud footsteps, operating office equipment and more. An isolated space is essential for discussions, calls, and small meetings.

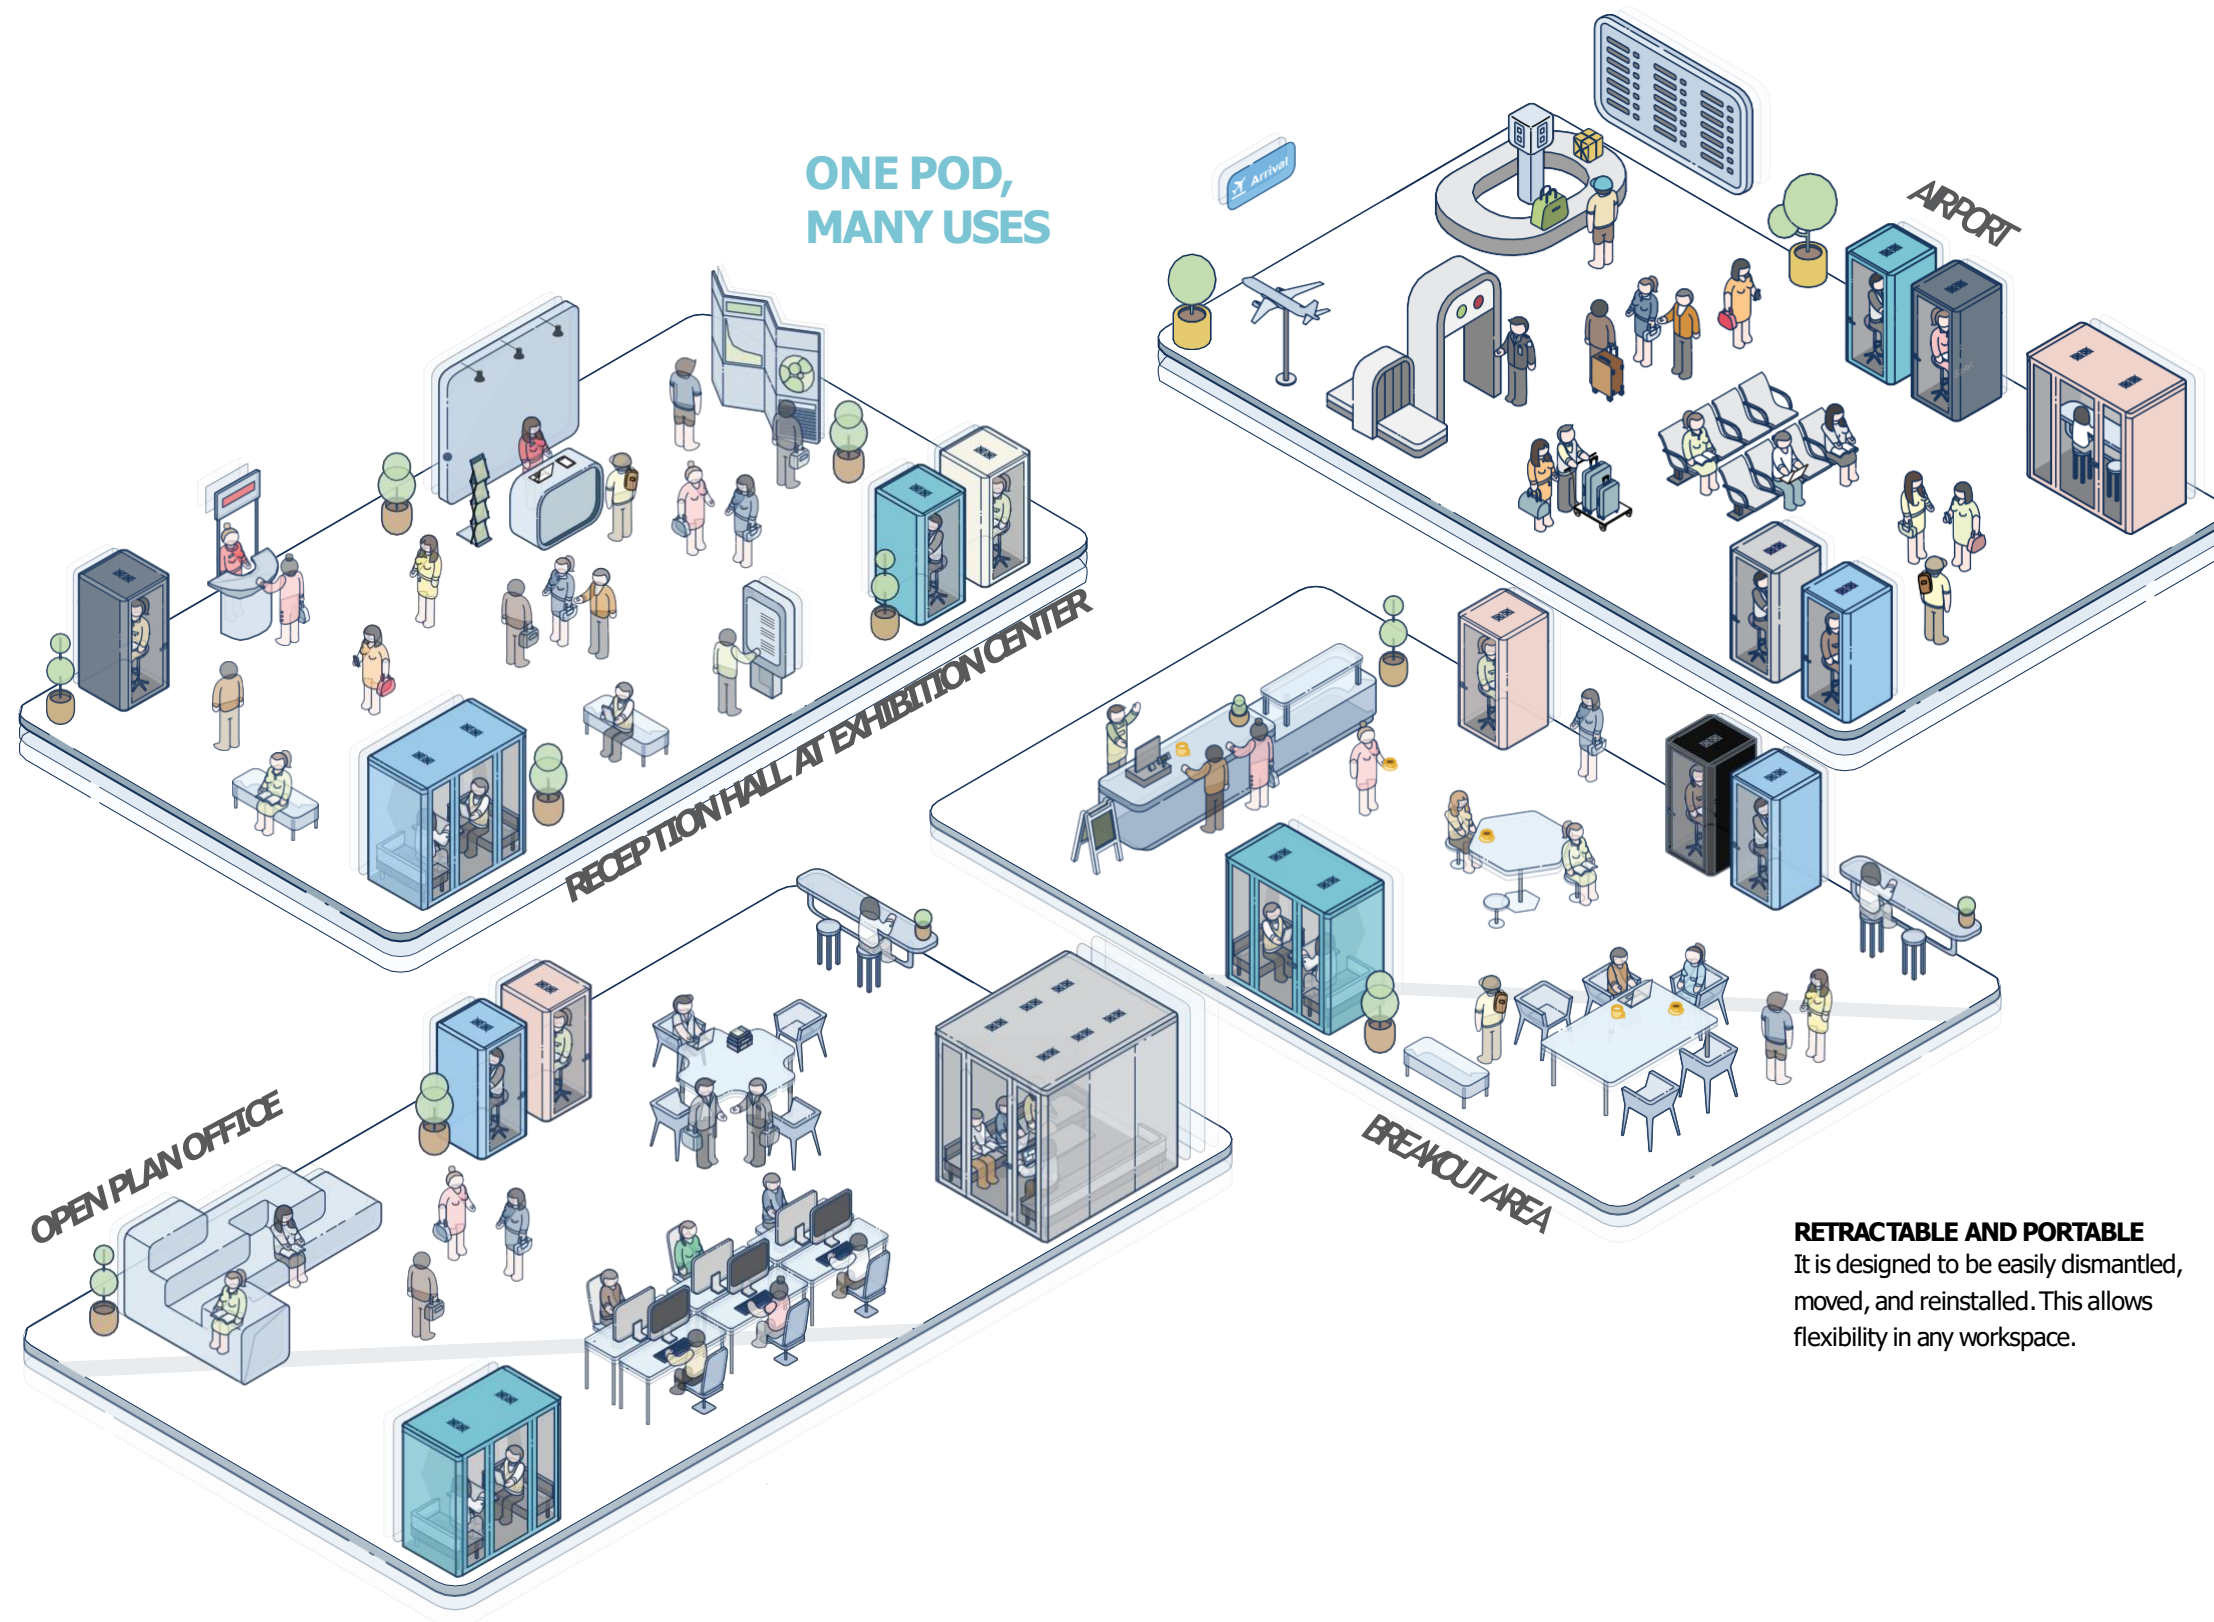

## RECEPTION HALL

A reception hall is usually filled with people walking in and out. This high traffic and layout create an environment that traps noise, making it an unwelcoming experience. The POD is crucial in providing comfort and privacy for both visitors and employees.

## BREAK-OUT AREA & CAFETERIA

The company break-out areas and canteen are prone to noise and reverberation. Under these circumstances, the POD is a perfect space for a much needed moment of rest and rejuvenation.

## ONE POD, MANY USES

## RETRACTABLE AND PORTABLE

It is designed to be easily dismantled, moved, and reinstalled. This allows flexibility in any workspace.
