

# CHAIRS COLLECTION

CUTTING EDGE TECHNOLOGY . REVOLUTIONARY AESTHETICS

The company believes itself as a collection of evolving capabilities, not merely as a collection of products alone. Relying on total quality management, Pace Seating has the ability to sense the market to empathize with and gain insights from customers. It has succeeded in producing chairs with a competitive edge in terms of ergonomics, aesthetical value, functionality, durability and price. Pace Seating aims to improve the working conditions in the office, thereby increasing the productivity and efficiency of human resources. A necessary fallout of this strategy has been Pace Seating's growing clientele, ranging from small businesses to institutions, and Indian and global corporations.

# Infrastructure

## Eco Concious

To reduce carbon foot print,  
Pace Seating chairs are shipped  
knock down for local assembly.  
Dis-assembly is just as simple  
for easy transportation to  
relocate for disposal.
